

Assemble Arc

This 3-Issue Arc is our second foray into cards featuring the Marvel Cinematic Universe (MCU). This Issue focuses on the mighty characters in the MCU who hail from Earth, like Killmonger, Hawkeye and Nick Fury. The next Issue focuses on many intergalactic characters like Groot, Talos, and Thanos and his children, and the final Issues features awesome female characters like Captain Marvel and Black Widow.

Bucky Barnes/ Winter Soldier

The New Fist of Hydra allows an enemy player to force Winter Soldier to stun a character on your side. When an enemy character pays for **Longing**, **Rusted**, **Furnace**, **Daybreak**, it can use one of its own "wild" Location(s).

Note: Any enemy character can pay for and use **Longing**, **Rusted**, **Furnace**, **Daybreak**, but two characters can't work together to pay for and use the power.

Hawkeye

When you spend a power symbol from a Location in your resource row to put Hawkeye into a **Nest**, put the Location card partly underneath him and leave it face up as the **Nest**. (If you pay for the power by discarding a Location or you reduce the cost of the power to zero power symbols, nothing happens.)

While Hawkeye's **Nest** is one of the Locations named on his card, he has the associated text.

While a Location is a **Nest**, it still counts as a Location and as being a face-up resource in your resource row, however it can't be used to generate a power symbol anymore. If the Location gets KO'd or leaves your side, the

Nest effect ends. If the Location gets turned face down by an effect, put it back into your resource row and the **Nest** effect ends.

When Hawkeye gets stunned or leaves your side, turn the Location face down and put it into your resource row and the **Nest** effect ends.

If Hawkeye uses **I Want You On That Roof** while he already has a **Nest**, turn the old **Nest** face down and put it into your resource row and the **Nest** effect ends.

Nick Fury

A Full Bird Colonel... and ... Turned Spy each give Supporting Characters on your side and you own **Soldier** or **Agent** respectively. (See "Select Keywords" for their definitions.) This means when a Supporting Character appears on your side, it will trigger its **Soldier/Agent** power and count each other Supporting Character on your side.

Note: A character can have multiple instances of **Soldier** or **Agent**. For example, if you give **Soldier** to a character that already has **Soldier**, when it appears, both instances of **Soldier** will trigger separately.

Red Skull

When you resolve **You Must Lose What You Love**, if there was a tie for highest cost Supporting Character, you choose which one gets discarded.

Baron von Strucker

To resolve the **Age of Miracles**, first choose a Supporting Character with 1 printed  other than Baron von Strucker. Then randomly select one of the six new Keyword Powers. That character gains the new power until it leaves play. (To randomly select a power, we recommend rolling a 6-sided die where 1 is **Dark** and 6 is **Wise**.)

Note: If you use **Age of Miracles** more than once on the same character, it's possible for them to get the same power twice. This is great with **Dark** and **Sly**, but not great with the other powers.

Bruce Banner

I Think I'm Getting The Hang of It! counts each time it was used this game by this card while it's in play. If it leaves play and comes back or later you have another copy of this card on your side, **I Think I'm Getting The Hang of It!** will start over.

Dodge: This character can't be ranged attacked.

Genius: At the start of your turn, draw a card.

Pounce: While this character is attacking an exhausted character, it can't strike back at this character.

Regeneration: At the start of your turn, heal a wound from this character.

Sniper: This character can ranged attack back row characters even while they're protected.

Soldier: When this character appears, put -1/-1 counters equal to the number of **Soldiers** on your side onto an enemy Supporting Character.

Stealth: This character can melee attack back row characters even while they're protected.

Wong

Guardian of These Books will trigger when you use an  Super Power, even if you don't actually spend an . For example, Bruce Banner's **I Think I'm Getting The Hang of It!** is an  and  Super Power and will trigger **Guardian of These Books** even if Bruce spends an  to use it (and even if he spends nothing because Iron Man is on your side!)

M'Baku

When M'Baku gives a character **Pounce** and **Dodge**, it will keep those powers until that character leaves play.

Arnim Zola

1. If you understand how **I Wrote an Algorithm** works, goto 2. If not, goto 3.
2. Cool. We're done here.
3. Start by reading Part 1 of the Super Power. Then if exactly one face-up enemy character has more ATK than each other face-up enemy character, go to Part 2 of the Super Power and stun that character. Otherwise go to Part 3 and put two -1/-1 counters on each enemy character. If everything now makes sense, goto 2 above. If not, goto 3 above.

You're the Last One

When this Plot Twist resolves, it cancels the combat. It then acts as though the player whose turn it is just said, "Okay, I'm done with my turn." And then, anything that triggers "At the end of the turn" will trigger, and the rest of the end-of-turn procedure will happen normally.

Select Keywords

The following keywords are featured on cards without a description.

Agent: When this character appears, look at cards from the top of your deck equal to the number of **Agents** on your side. Put any of those cards on the bottom of your deck, and the rest back in any order.
